# High Output LED Machine Lite Green-Lite™

## American Made – Since 1883!

The O.C. White Green-Lite™ High Intensity LED Linear machine light represents the pinnacle of American made quality, sleek design, and outstanding performance.

The solid die-cast aluminum body construction is for more than just show! It is an integral feature of this light, acting as the heat sink for the LED arrays. This light also features tempered safety glass and a slim, nickel plated bezel. It is engineered to withstand even the harshest conditions. Unlike the plastic and thin-walled extrusions our competitors use, this light is made to last a lifetime.

Made in the U.S.A.

## Worldwide Appeal

This light can be used on virtually any mill, lathe, grinder, or a variety of other machines in service across the world. You decide between 24VDC (from the machine) or one of our 100-240V (50/60hz) worldwide approved transformers.

## “Green” Long Before It Was Fashionable

One of the most advanced features of the Green-Lite™ Linear LED is the “Patent Pending” thermal dimming controls. If the light exceeds our maximum temperature threshold, it will automatically dim itself to cool down, and greatly extend its service life.

Also due to our best-in-class engineering, Green-Lite™ Linear LED fixtures have **TWICE** the light output from the same wattage compared to our competition, and far exceeds the old style fluorescent lights.

## Exclusive Quick Magnetic Mount or Permanent Installation

With O.C. White, the choice is yours. Each mounting foot comes complete with a pair of high strength Neodymium magnets preinstalled at the factory. These allow for a quick magnet mount installation anywhere. Each lighting fixture also includes (4) countersunk screw holes for permanent installation.

## Limitless Installation Possibilities

The specialized design of the Green-Lite™ High Intensity Linear LED machine light allows for up to (3) lighting fixtures to be run from a single power point. This drastically reduces wire clutter and affords a much faster installation.

You can now illuminate even the largest cabinets with ease.

Underside of magnetic feet

## Adjustable To Any Angle

You can adjust the angle of light 45° in each direction (90° total articulation). This opens up limitless installation possibilities, while still putting the light exactly where you want it.

## Standard Configuration

LED-1936-24V  
1 Light 24V DC Kit

LED-1936-120V  
1 Light AC Kit

## Optional Configuration

LED-1936-2-24V  
2 Light 24V DC Kit

LED-1936-2-120V  
2 Light 120V AC Kit

LED-1936-3-24V  
3 Light 24V DC Kit

LED-1936-3-120V  
3 Light 120V AC Kit

## Optional Accessories

P/N: DIM-1936  
Dimmer Module and Cord (6 ft / 1.8 m)  
Enables LED Dimming

P/N: 13070  
Extension Cable (6 ft / 1.8 m)  
Use in between interconnect cable and light

## Technical Specifications

- Made in America
- Integrated Magnets in Feet for Quick Install
- IP67 Waterproof/Oil Proof
- 24VDC or 100-240V models
- 38W/1.6A
- Die Cast Aluminum Body with Tempered Safety Glass
- Ability to Daisy-chain up to (3) Lights from Single Power Source
- "Patent Pending" Thermal Dimming Controls
- 5 Year/50,000 Hour Pro-rated Mechanical Warranty
